

# HELP FILE

**This file is a guide to using Neon Sign Titles Presets.**

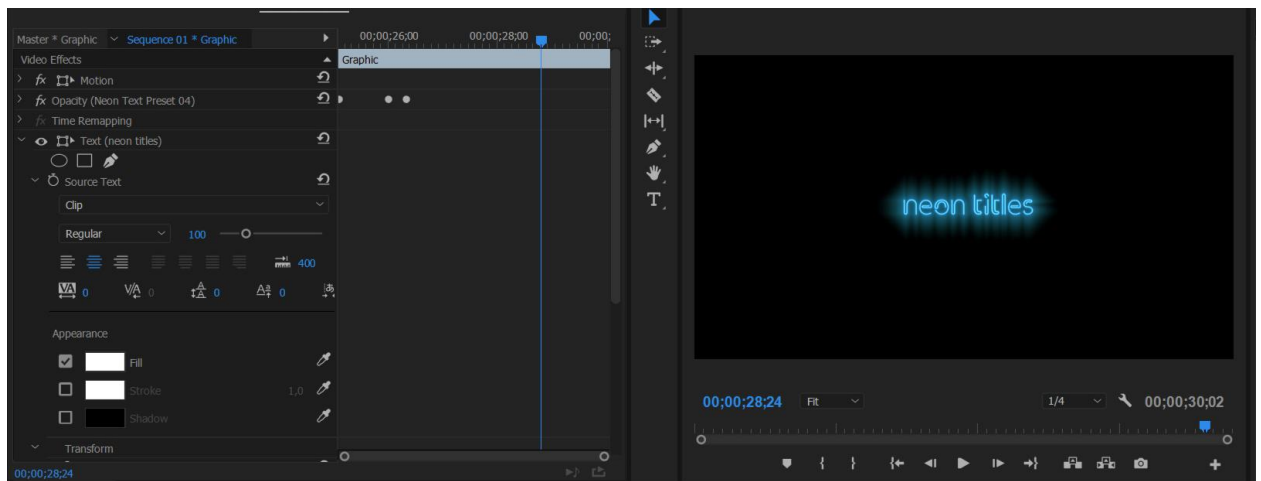

**Let's start!**

**There are 2 types of presets in the project:**

**1. Text Presets**

**2. Shape Presets**

In order to use Text Presets, you need to create text, select the length of the text layer in time, then move one of the five text presets to your text. Done!

In order to use shape presets, you need to create a shape, to do this, select the pen tool, like shape shapes, move any of the four shape presets onto it. Done!
